### Work Experience

- Uni- Assist at Begutachter Internationaler Studienbewerbungen  
01.03.2023- until now

This is about processing the documents of all students who want to apply to different universities in Germany.

- DAIMLER AG at Produktionshelfer  
10.08.2021 – 17.09.2021

A production helper is an unskilled worker in the automated manufacturing process. They are basically unskilled workers whos perform simple tasks.

- DRÄGER at Sicherungsposten  
14.08.2020 – 11.09.2020

The security guards are all-rounders you can rely on. As gas guards, fire guards or traffic guards, they ensure that the procedures and regulations you specify are adhered to – and they know what to do if something should happen.

## Education

**Bachelor in Medizininformatik** Technische Hochschule Brandenburg 30.09.2019 – aktuell

The aim of curriculum is therefore to develop methods and tools for data analysis, image and signal processing and the use of mobile sensors to improve health care and health prevention, based on a solid background in computer science and medicine

**Deutsches Sprachinstitut** Technische Hochschule Brandenburg 18.03.2019 – 24.06.2019

German is the second most important language in the field of science. In the field of research and development, Germany ranks third in the world and offers scholarships to foreign scientists.

**Informatik University** of Douala 04.09.2017 – 02.05.2018

The best way to get to know the world of computers is to take a computer science course and learn computer science with a teacher. Discover the different computer tools and devices and learn how to use them efficiently: Learn programming and coding. Develop apps and programmes.

**Abitur** Preisträger- Hochschule 04.09.2007 – 30.05.2015

It prepares students for long term higher education, at university, in preparatory classes, in schools (business, engineering etc).
